

Pilot Issue: Anyone see an Elephant in the Room?

THE TICKING TIME BOMB

For years whenever I flew I always gave the Aspartame Pilot packet to the pilots and entire crew. It contains Neurosurgeon Dr. Russell Blaylock's pilot alert http://www.mpwhi.com/pilot_aspartame_alert_with_letters.htm, the FDA report of 92 symptoms from four types of seizures to blindness and death, flyers on aspartame and other indepth reports. Today I no longer fly. They have vaccinated the pilots with a nano bioweapon.

https://live.childrenshealthdefense.org/shows/good-morning-chd?utm_source=salsa&utm_medium=email&utm_campaign=chdtv&utm_term=c

Above from the Children's Health Defense an interview with Josh Yoder of the US Freedom Flyers discussing what is happening with the pilots since they were vaccinated. Some are experiencing the cardiac problems that have now become well known from the vaxx. Some could have myocarditis and since they may be symptom free, problems could become worse without the realization of the pilot. One pilot who went into cardiac arrest said, "I'll never fly again"! Bob Snow who was also interviewed said disability claims are way up. The pilots cannot even mention their problems because then they would lose their jobs just as with excitoneurotoxic aspartame. According to this interview the airlines have lost 20 or 30% of their work force. Flights have been cancelled and they are having to train more pilots. You can't go back, the deed has been done.

The National Enquirer wrote the article "Terror in the Skies" and said pilots were committing suicide and crashing planes. <https://www.pressreader.com/usa/national-enquirer/20190408/281556587170827> Even they said it's Russian Roulette to fly. If they are using aspartame, or diet soda, the serotonin can be depleted as much as 74% states a study and that causes psychiatric and behavioral problems and suicidal tendencies. <https://thenhf.com/2019/03/24/aspartame-depletes-brain-neurotransmitters/> Psychiatrist Dr. Ralph Walton wrote the book "Double Blind: Science, Corruption & the Diseases of Civilization" for further information. There are many medical texts on aspartame such as "Aspartame Disease: An Ignored Epidemic" by the late Dr. H. J. Roberts, "Excitotoxins: The Taste That Kills" by Dr. Russell Blaylock, "While Science Sleeps: A Sweetener Kills" by Dr. Woodrow Monte, and many more. Add to this what they are doing to the atmosphere: https://mediaarchives.gsradio.net/rense/special/rense_022621_hr2.mp3

From Pfizer record of reactions on the vaxx, here are just a few: Autoimmune blister disease, autoimmune myocarditis, autoimmune pancreatitis, autoimmune hepatitis, Axillary vein thrombosis, Axonal and demyelinating polyneuropathy, Cardiac amyloidosis, Cardiac Arrest, Cardiac Failure acute, Cardiac sarcoidosis, Cardiac Ventricular thrombosis, Cardiovascular

insufficiency, autoimmune retinopathy, carotid arterial vasculitis. Automatism epileptic, and on and on and on.....Is this autoimmune blister disease Monkey Pox? No wonder the "vaccine" is already available! Remember Covid19 is not a vaccine, it's a gene therapy and it was patented 22 years ago under the classification of nano bioweapon. This is what the pilots have been vaccinated with. It's also in the flu and polio vaccines says Dr. Judy Mikovits (author of "Plague of Corruption").

Can one even imagine the combination of this nano bioweapon and aspartame which is a biochemical warfare weapon: http://www.mpwhi.com/ecologist_september_2005.pdf Also if the pilot is using aspartame products like Equal or diet soda and using medication they can interact because aspartame damages the mitochondria or powerhouse of the cell just like the vaxx does. They are both systemic poisons. Here is the Hospital Report which has some of the drugs aspartame will interact with from the medical text, "Aspartame Disease: An Ignored Epidemic" - http://www.mpwhi.com/aspartame_hospital_form.htm I put this together for people to take to the hospital because even I was given a medication that had aspartame in it unlabeled causing a heart attack in the hospital. The drug had Vanillin in it which is genetically engineered with aspartame. Then the FDA approves Advantame which is 50% aspartame and 50% Vanillin. The FDA was sent the studies that showed interaction. Stephen Fox, Mission Possible New Mexico ordered FDA Commissioner **Robert M. Califf** to remove aspartame from the market. I sent the medical text "Aspartame Disease: An Ignored Epidemic" by Dr. Roberts to the FDA with a second petition to ban. They told me they could not accept it because they didn't want me to mention anything before 2001. In 1985 Dr. Adrian Gross of the FDA told the Senate it was on the market illegally because it violated the Delaney Amendment causing brain tumors and brain cancer. Dr Ken Stoller, Dr. Woodrow Monte (Community Nutrition Institute), 12 toxicologists, Dr. Roberts and others have filed for ban. The FDA refuses because they are run by Big Pharma.

According to Josh Yoder of the US Freedom Flyers the FAA should have done something. The FAA has told me for years they can't tell pilots not to use aspartame because the FDA approved it, but they warn them on the side. It was never proven safe but was marketed due to the political chicanery of Donald Rumsfeld which is why its called "Rumsfeld's Plague". Our representative for Aviation Safety is Captain Fred Fox who flew for American for 35 years until he retired with atrial fibrillation because of aspartame. Just before he left six American pilots died from this poison. Pilots are not suppose to drink alcohol but there is free methyl alcohol in aspartame which converts to formaldehyde and formic acid. See the Trocho Study: http://www.mpwhi.com/formaldehyde_from_aspartame.pdf.

Mission Possible Aviation was created when Pilot Cliff Evans crashed his plane in a tree and lived to tell about it. As Dr. Russell Blaylock said: "I have reviewed reports from airline and private pilots concerning effects of aspartame on various physiological systems. Several of these are related to the nervous system, which puts this in category of great concern to the pilot as well as the general public. The more common complaints include disorientation, difficulty thinking and concentrating, visual blurring or even monocular blindness, seizures and heart failure. It is well known that the ingredients in aspartame, as well as its breakdown products, have deleterious effects on the nervous system and retina."

Four British pilots died after being vaxed. There are so many people dropping dead they came

up with SADS, Sudden Adult Death Syndrome. Just recently they started calling it ***a new kind of deadly virus - ABV Viral Disease. Its unabbreviated version is the deadly Anything but Vaccines virus.*** Doesn't anyone see the elephant in the room? The pilot cases of Mission Possible Aviation are private so the pilots won't get grounded as they get off aspartame but you can read a case without a name below my signature.

Subject: CONFIDENTIAL PLEASE!

Wow, what a great thing you are doing. I had my suspicions about this poison when it first came out. I like most people began consuming it in diet colas. When I read one of the testimonials, it all sounded so familiar! By the way, since I began consuming aspartame, my body weight has climbed (from 163 to 210) over the years. Even when I was VERY actively running and engaging in karate practice, I continued to gain, Lower metabolism due to age the doc said. I'm 41. Energy loss, carb cravings, weight gain, and speech problems (dyslexic speech, getting words backwards instead of letters) and a seeming loss of intelligence. (I ACED THE FAA AIR TRAFFIC CONTROLLER TEST IN 1987 AND AM A LICENSED COMM PILOT W INSTRUMENT RATING). Since then, I don't even play chess as well as I used to. I have regular physicals, and even had a CAT scan at the ER one night because of a headache so severe, I couldn't stand it (the worst in my life). There was nothing wrong. Strange...when I read that one testimonial...it spooked me. I QUIT,TODAY...Thank God I don't and never have let my kids consume it, ever! And my wife was smart enough not to consume it while pregnant (EVEN THOUGH THE DOC SAID IT'S OK!)From now on, it's sugar..the real thing from now on for me too.
Thanks for all you are doing. DO NOT USE MY NAME OR WEBSITE!!! THE TEXT YOU MAY DO WITH AS YOU WISH. Thank you! P.S.. Could kidney stones be a side effect??

Note he says he gained weight. If you want to get fat NutraSweet is where it's at. Six class actions were filed on aspartame and obesity and not one judge would hear a case no matter how many scientific peer reviewed studies added. As one attorney said, he would be happy if they just took the T off of diet. In answer to the pilot's question aspartame ravages every organ in the body. Here is the FDA report of 92 symptoms: http://www.mpwhi.com/92_aspartame_symptoms.pdf
