

Dr. Michael Yeadon, 20 Years At Pfizer, Chief Scientist: Final Warning, Corona Virus Scam - Utter Nonsense! Also: FDA Reverses Itself: Rejects Covid Antibody Test Results, Insanity Reigns

<https://www.brighteon.com/05c09e49-8364-43fd-9e29-e5ed9652675f>

Do not miss listening to this and absolutely send it around the world. He starts with this whole corona virus has never been a threat, its all utter nonsense. Nobody needed a vaccine. Now its July, does somebody have a summer cold or hay fever? He can't believe anyone would be stupid enough to believe there is a virus out there.

He says these government lies came out all at the same time in different countries. This was planned for years. indeed. In the beginning everybody believed it existed. The host asks Dr. Yeadon "why are people dying". He explains this so well. He says they are dying from the same things they have always been dying from. That usually when someone has the flu or is sick they stay at home and don't spread anything to anyone else. However, when they go to the hospital in that setting, and with other medical problems they have they can die. I understand probably the most because I almost died four times in a hospital because they put aspartame in the drugs and sometimes unlabeled and they damage the mitochondria or powerhouse of the cell and interact. It stopped me from breathing four times and once after they gave me a dose of an aspartame containing drug (had Vanillin in it, genetically engineered with aspartame) I had a heart attack. Think of all the people using aspartame that go in the hospital and probably die just from the interaction. They may be dying from the diseases it triggers or precipitates, seizures, strokes, sudden cardiac death, MS, lupus, etc. It's also an adjuvant. It interacts with vaccines. Nobody has a chance. Then you have all the chemicals the FDA has allowed, and I've read where one scientist said "it's the additives".

Dr. Yeadon says don't comply. If someone has a virus there are drugs available that will take care of it. He says there is no threat of death and that asymptomatic people do not have a disease. When you get sick you get symptoms. This is one of the finest video's I've listened to because I have found that people listen to the propaganda and the government, never research and just go roll up their sleeve. The vaxx is a nano bioweapon to depopulate. People are dropping dead including pilots. They are even giving this to pregnant women and the New England Journal of Medicine says 4 out of 5 are losing their babies. It is no wonder it is called the worst hoax in human history.

Dr. Yeadon explains he is retired now, he is a wealthy man, is not anti-vax and has no

motive. He says every bit of this is utter nonsense. . He says its so bad he has a list that the police should arrest and I don't have to ask who they are.

Dr. Yeadon ends by saying "take off that mask, throw it away, put your arms around your family and friends and hug and kiss them." He is right, the people behind this should be arrested. The globalists want a New World Order and to control the people. When they couldn't get a diagnosis of corona virus they simply used it and told pantheists to use it regardless of the real diagnosis. Doctors have been screaming out about this and they have a censor program that is brutal. It's like their program against aspartame. Dr. Ralph Walton send me 5 of his new medical text, "Double Blind: Science, Corruption & the Diseases of Civilization", his 40 years trying to expose this deadly chemical and get it removed from the marketplace. They were removed at the post office and what I got was a package of red trays. See the picture: <https://rense.com/general96/censorship-even-at-the-post-office.php>

Even the FDA who usually doesn't have the courage of a mosquito because of their alliance with Big Pharma has reversed themselves:

Subject: FDA Reverses Itself: Rejects COVID antibody test results; insanity reigns

FDA Reverses Itself: Rejects COVID Antibody Test Results; Insanity Reigns

Wednesday, July 7, 2021 5:49

Even a robot programmed to “follow the science” would throw up his hands in despair while reading the latest FDA COVID pronouncement.

After untold numbers of people have been given antibody tests to determine their COVID status, the FDA now states:

Today, the U.S. Food and Drug Administration issued a safety communication informing the public that results from SARS-CoV-2 antibody tests should not be used to evaluate immunity or protection from COVID-19 at any time, and especially after the person received a COVID-19 vaccination.”

Boom.

I’m imagining just a small sample of people perhaps 5000 marching in unison into a hospital, saying, “*We tested positive for COVID on an antibody test...and then we had to isolate, and some of us were treated with toxic drugs...and NOW we learn that **the antibody test is useless...***”

The FDA document, dated May 19, 2021, is titled: [**“FDA In Brief: FDA Advises Against Use of SARS-CoV-2 Antibody Test Results to Evaluate Immunity or Protection From COVID-19, Including After Vaccination”**](#).

Digging a little deeper in the document, we have a statement referring to the COVID vaccine:

The authorized vaccines for prevention of COVID-19 induce antibodies to specific viral protein targets; post-vaccination antibody test results will be negative in individuals without a history of previous natural infection if the test used does not detect the type of antibodies induced by the vaccine.” [\[1\]](#) [\[2\]](#)

In other words, the FDA is saying, ***“Look, the vaccine creates specific antibodies against the spike protein, not the virus. If you take the standard antibody test after vaccination, it’ll be useless, because the test isn’t meant to detect antibodies against the spike protein. It only detects antibodies against the virus.”*** [\[3\]](#)

This raises several serious questions. One of them is: Since developing antibody tests is as easy as pie, why hasn't the FDA developed one that detects antibodies against the spike protein?

And the answer to that question is obvious. If the FDA did develop such a test, then in terms of conventional vaccine theory it would be easy to see how well the vaccine is working, or not working.

And THAT is not a goal public health officials want to achieve. That is not a risk worth taking. Suppose, after testing 20,000 vaccinated people, it turns out that only 800 have produced antibodies against the spike protein?

Another (unanswered) question: Are specific antibodies against the spike protein, conferred by the vaccine, sufficient to neutralize, disable, destroy the actual virus if it drops down out of a cloud and tries to infect a vaccinated person?

Of course, as my readers know, I've spent a year demonstrating that **no one has proved the SARS-CoV-2 virus exists**. However, I make many forays into the insane world where people believe the virus is real; and I show that even within that world, the **experts contradict themselves and compound their egregious fallacies** like rabbits spawning babies.

[2] [FDA Advises Against Use of SARS-CoV-2 Antibody Test Results to Evaluate Immunity or Protection From COVID-19, Including After Vaccination – ARCHIVED VERSION](#) [[back](#)]

[3] [COVID: here come the antibody tests quick, easy, and insane](#) [[back](#)]

This latest foray shows **the FDA is both criminal and insane**.
